

"I'm Looking For Volunteers To Join Me On Our Blood Donor Team !"

In appreciation of your valuable donation, a complimentary bag of Pro Plan® will be donated by one of our sponsors, Ralston Purina Company.

Antech Diagnostics has graciously donated their services to assist with the lab testing of all potential donors.

**BLOOD SHARED ...
MEANS LIVES SPARED**

YOUR PET COULD SAVE A LIFE

BY JOINING OUR BLOOD DONOR PROGRAM

at the heart of critical care

It's True!

Even animals need blood transfusions and your pet's donation could save the life of someone else's best friend.

The Animal Emergency Center is always looking for healthy dogs and cats to join our program. Cats and dogs may donate as often as once every two months. Just like people, animals that suffer from trauma, anemia or bleeding disorders, can also require a life-saving transfusion.

To ensure that all blood products used are of the optimum quality, we have developed certain criteria for evaluating the health status of potential donors. Here is a summary of our requirements for entry into the program:

DOGS

- Age: One to six years
- Weight: 50 pounds or greater
- Your dog must be current on rabies and distemper/parvovirus vaccinations
- Heartworm status must be negative and your dog must be on preventative medication.
- Your dog must not have any ongoing health problems or be on medications
- There must be no previous history of transfusion therapy
- Your dog should have a pleasant disposition

CATS

- Age: One to seven years
- Weight: 10 to 15 pounds
- Your cat must be current on rabies and upper respiratory vaccinations
- Your cat must be FeLV/FIV/FIP negative
- Your cat must not have any ongoing health problems or be on medications
- There must be no previous history of transfusion therapy
- Your cat should have a pleasant disposition
- Ideally, your cat should be an indoor pet
